

A General RPVA evaluation layer

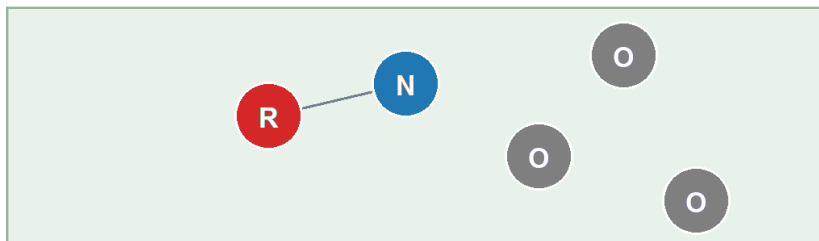

Evaluation above a prespecified prediction protocol

B NFL nested audit states

D and C are retrospective audit states

C Relational roles within a play

N is proximity-defined; it is not coverage assignment.

D Forward-time empirical design

5.44M tracking rows → 14,108 eligible plays → 46,045 player-play units

3,246 held-out plays → 2,307 three-role audit plays
